Professional Summary

Software Engineer experienced in bridging **business requirements and engineering execution**, with hands-on experience in solution architecture, system design, and full-stack development. Experienced in **Agentic AI, AWS AgentCore, Amazon Bedrock** and across requirements, Agile delivery, implementation, and production support.

Professional Experience

Mindstix Software Labs Jun 2025 – Present
Software Developer Pune, India

- **AI Order Notes Summarization Agent:** Architected and operated a production AI agent on **AWS Bedrock AgentCore** across **2 production regions** with shared Keycloak/OAuth authentication, automating LLM-based note summarization and replacing manual review.
- Re-engineered the request lifecycle with **SSE streaming**, resolving a cascading 3-tier timeout failure and reducing average generation time from **35s to ∼20s (∼43% improvement)**. Resolved **15+ production/QA defects** across async races, CORS, OAuth/JWT, and legacy integrations.

CSR Copilot & Claims Analysis: Built a POC with Amazon Connect, Flask / Socket.IO, OpenAI and Milvus for policy retrieval and contextual call assistance, alongside evidence-backed claims analysis for reviewer assessment.

- **RCA System:** Developed a **multi-agent RCA system** on AWS Bedrock AgentCore using CloudWatch Observer, Analyzer, GitHub MCP, Web Search, and Finalizer agents to localize production failures and generate RCA documents via S3.
- **Full-Stack & Enterprise Delivery:** Delivered FMCG production features using **React 18, Node.js, NestJS, and databases**, translating functional requirements into scalable components across the SDLC while collaborating across frontend and backend teams.
- Triaged production issues within a **24-hour window** using SonarQube and Splunk, contributing to a **50% reduction in recurring system errors**. Participated in **sprint planning, backlog refinement, estimation, and Agile delivery**.

OmneVu Dec 2024 – Jun 2025
Full Stack Developer Intern Remote

- Enhanced an Inventory Management System using **React, Express.js, and Firebase**, improving data accuracy by **∼20%** and reducing manual reconciliation by **∼5 hours/week**.
- Redesigned Warranty Management workflows and Retail UI flows using **React, Material-UI, Vite, and Firebase**, reducing claim resolution time by **∼30%** and contributing to a **∼15% increase in product page engagement**.

Projects

VidhaanAI *React, Node.js, OpenAI API, LangChain, Pinecone, Redis*

- Developed an **LLM orchestration platform** with hybrid semantic + keyword RAG, conversation memory, and multi-agent coordination across **4+ agent roles**.
- Reduced hallucination rate by **∼35%** (∼40% to ∼26%) using a custom evaluation framework on a **50-query enterprise benchmark**; built streaming WebSocket APIs and React UI supporting **20+ concurrent sessions**.

Technical Skills

Agentic AI: AWS AgentCore, Amazon Bedrock, LangChain, RAG, Multi-Agent Systems, Prompt Engineering, MCP
Development: React 18, TypeScript, JavaScript, Node.js, Express.js, Java, Flask, REST APIs, WebSockets
Cloud & Data: AWS, AWS Connect, CloudWatch, S3, MongoDB, SQL, Pinecone, Redis
Product & Engineering: Solution Architecture, System Design, Requirements Analysis, Agile/Scrum, Sprint Planning, Backlog Refinement, Git, GitHub, SonarQube, Dynatrace

Education

Vishwakarma Institute of Information Technology 2021 – 2025
B.Tech in Information Technology CGPA: 8.91 / 10
